The former Vice Chancellor of Makerere University, Prof. Senteza Kajubi has called tax waivers for science promoters in the country.

Prof. Kajubi has said in Kampala today that giving tax exemption to promoters of science in Uganda would promote the learning of science courses.

The professor further says tax waivers will encourage business enterprises to invest in modern science laboratories.

He says investment in modern science laboratories will help students to carry out scientific experiments.

Prof. Kajubi says many individual Ugandans and organizations fear to invest all their resources in promotion of science due to high taxes the development attracts.
