Government has been asked to develop legislation which compels the private sector to invest in the development of higher education.

The call was made by the Makerere university chancellor Prof. Mondo Kagonyera while addressing graduands at the ongoing 61st graduation ceremony.

Prof. Kagonyera says, many corporate organizations make profits and repatriate them to their home countries without being mindful of what society offers to them.

Kagonyera adds that, though the private plays a key role the country's economic development, education needs to be given the attention it deserves.
