

3RD OHCEA INTERNATIONAL ONE HEALTH CONFERENCE

ONE HEALTH PUBLIC LECTURE

THEME / LEAVING NO ONE BEHIND: TRANSFORMING EDUCATION SYSTEMS USING ONE HEALTH APPROACHES FOR NEXT GENERATION PROFESSIONALS.

23RD JULY 2019, Imperial Royale Hotel, Kampala - Uganda 1:30Pm - 4:00Pm

The One Health approach is an innovative strategy that promotes multi-sectoral and interdisciplinary application of knowledge and skills to address complex challenges at the human, animal and environmental interphase. One Health is a globally recognized strategy to promote the collaborative effort of multiple disciplines, working locally, nationally and globally, to attain optimal health for people, animals and the environment.

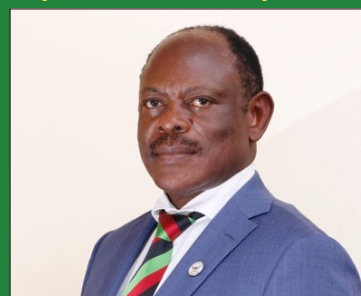

TARGET

Are you a lecturer, a student or a member of management in one of the universities in Uganda?

Are you a practitioner in a field that impacts human, animal health or the environment?

Are you a policy-maker or a leader in your community?

Are you a young person interested in making a different in your community?

Host: **Professor Nawangwe**

The Public Lecture will be hosted by Professor Barnabas Nawangwe (Makerere University Vice Chancellor) and delivered by a renowned One Health thought-leader; Dr. Dennis Carroll of USAID - Washington DC.

GUEST SPEAKER

Dr. Dennis Carroll, Director
USAID - Global Health Security
and Development Unit

Health Security.

Dr. Carroll was initially detailed to USAID from the U.S. Centers for Disease Control and Prevention as a senior public health advisor in 1991. In 1995 he was named the Agency's Senior Infectious Diseases advisor, responsible for overseeing the Agency's programs in malaria, Tuberculosis, antimicrobial resistance, disease surveillance, as well as neglected and emerging infectious diseases. In this capacity Dr. Carroll was directly involved in the development and introduction of a range of new technologies for disease prevention and control, including: community-based delivery of treatment of onchocerciasis, rapid diagnostics

for malaria, new treatment therapies for drug resistant malaria, intermittent therapy for pregnant women and "long-lasting" insecticide treated bed-nets for prevention of malaria. He was responsible for the initial design and development of the President's Malaria Initiative. Dr. Carroll officially left CDC and joined USAID in 2005 when he assumed responsibility for leading the USAID response to the spread of avian influenza.

Dr. Carroll has a doctorate in biomedical research with a special focus in tropical infectious diseases from the University of Massachusetts at Amherst, USA. He was a Research Scientist at Cold Spring Harbor Laboratory where he studied the molecular mechanics of viral infection. Dr. Carroll has received awards from both CDC and USAID, including the 2006 USAID Science and Technology Award for his work on malaria and avian influenza, and the 2008 Administrator's Management Innovation Award for his management of the Agency's Avian and Pandemic Influenza program. In 2018, he received the Scowcroft Institute of International Affairs at The Bush School of Government and Public Service at Texas A&M University's lifetime achievement award for his leadership in One Health and public service throughout his career.

Dr. Carroll has delivered talks on One Health at several international meetings.
