

RESPONSIBLE CONDUCT OF RESEARCH (RCR) COURSE

February 26th -28th, 2025 | MaKCHS ConferenceRoom

Background

The SUSTAIN: Advancing Makerere University Masters of Health Sciences in Bioethics program at Makerere University College of Health Sciences aims at developing and institutionalizing a mentorship program in research ethics that facilitates development of bioethics professionals and health researchers who are committed to the growth and application of research ethics in Uganda's academic and research institutions to the highest possible degree. The Responsible Conduct of Research (RCR) course is one of the short courses that introduces trainees to a framework that involves application of established scientific, professional norms and ethical principles in the performance of all activities related to scientific research.

Course objectives

At the end of this course, trainees should be able to identify, manage and prevent research misconduct.

Course outline

Introduction to RCR; Introduction to Professionalism and Ethics; Human subject's protection and regulatory framework in Uganda; Humane handling of animal research subjects; Conflict of interest; Responsible laboratory practices; Mentor-mentee relationships; Collaborative research (international, industry); Peer review; Research misconduct (including policies for handling misconduct); Community involvement during research in a low resource setting; Responsibility to society and environment; Responsible financial management; Data acquisition, management, sharing and ownership; Responsible authorship, publication and communication.
